The Immune System

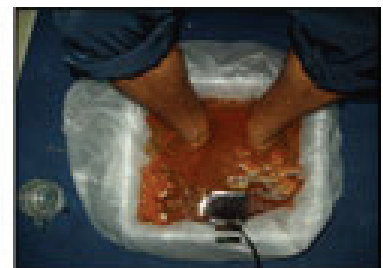

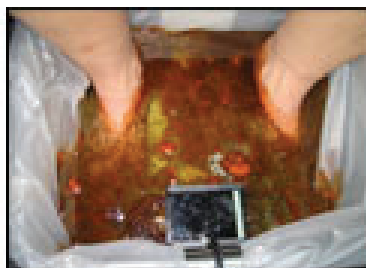

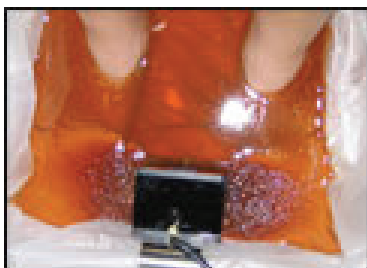

## RECHARGE YOUR BODY

The life span and health of a human is determined by the amount of electrons that they carry in the body. A healthy person is supposed to contain 80% of negative electrons <Anion> and 20% of positive electrons <Cation> in the body, which is more commonly known as Yin Yang (+ive & -ive) balancing.

Because of poor diet and high stress, we tend to accumulate and store excessive quantities of waste products such as diacetic, lactic, pyruvic, uric, carbonic, acetic, butyric and heptic acids.

The *Ion Spa* with built in micro computer system will generate negative potential field in the water and through process of osmosis; it will strengthen the cells activation in the body.

## HOW ION SPA WORKS

The *Ion Spa* machine generates negative potential field in the water and these negative fields travel to the body to re-activate and re-charge the positively (unbalanced) charged human cell.

A water molecule is composed of two hydrogen atoms and one oxygen atom. When the molecule loses a hydrogen atom, the remaining OH molecule takes on a negative charge.

This process is essential for a healthy body. During the ionizing process, your body absorbs millions of the negatively charged ions, which alkalize the blood and tissue. Your feet are in direct contact with the ions being manufactured in the water.

## RECHARGE YOUR BODY

Ions were first theorized by Michael Faraday around 1830, to describe the portions of molecules that travel either to an anode or to a cathode. However the mechanism by which this was achieved was not described until 1884 by Svante August in his doctoral dissertation to the University of Uppsala. His theory won the Nobel Prize in Chemistry in 1903.

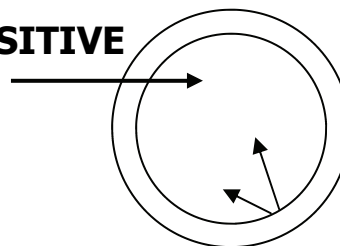

### ACTIVE CELL

ION NEGATIVE

### NON ACTIVE CELL

ION POSITIVE

**TOXIN BUILD UP**

**Negative ION'S activate cell tissues to have stronger absorption of nutrients and allow for effective detoxification. Positively charged cell tissues are not energized and will build up toxins. Poor in nutritional absorption they are high in toxicity.**

Statistics show that 91% of deaths in the world today are caused by some form of Disease (World Health Organization Mortality Statistics 2002). Many of these diseases are caused by factors arising from lifestyles alien to our nature as human beings.

One such alien element brought about by the industrial revolution is toxins in the environment, which causes adverse chemical and physiological reactions when absorbed into the body.

This undermines our health and well-being by interfering with our bodies biochemical functions. If toxins continue to accumulate faster than they are eliminated, this can cause harm to the internal organs and greatly reduce the function of our immune system.
