

# CELL LIFT S-PDRN THERAPY

- Wrinkle improvement
- Supply of vitality
- Whitening effect
- Nutrient supply

## WHAT IS PDRN?

PDRN is a regenerative ingredient derived from salmon DNA, widely used in Korean skincare. It stimulates cell repair, boosts collagen production, and enhances skin healing, making it effective for anti-aging, brightening, and post-treatment recovery. Found in serums, creams, and professional treatments, PDRN helps restore firmness, improve hydration, and support a healthier, more resilient complexion.
